

# Java Strategy Keynote

MAKE THE  
FUTURE  
JAVA

ORACLE®

# Make the Future Java

- Platform Completeness
- Modernization and Innovation
- Developer Productivity
- Open, Transparent Evolution
- Active Community Involvement
- Quality and Security

# Java Strategy and Vision

## Java SE

- **JDK 7:** adoption strong among ISVs, hosting providers, developers
- **JDK 8/9:** Lambda, JavaScript interop and JVM convergence in 8, Jigsaw in 9
- **JDK 9 and beyond:** generic language interop, GPU programming, enhancements for cloud

## JavaFX/Client

- Rich UI for tools, desktop and embedded applications
- Integration with Swing/SWT/HTML5 content
- Enable App Stores and other bundled deployment models
- Move away from browser plugin over time

## Java EE

- **Java EE 6:** Wide developer adoption; Available on all application servers
- **Java EE 7:** Target early 2013; Focus on HTML 5 and developer simplicity
- **Java EE 8:** Continued investment in Cloud capabilities and modularity

# Java Strategy and Vision

## Java ME

- Move towards single platform JSR
- Subset of SE, merge ME/SE tool and API ecosystems
- Generic small footprint platform for small embedded devices
- Enable Java everywhere in “Internet of Things”

## Java Card

- Expand to generic security platform any device
- Enable rich ecosystem of security applications
- Use as foundation for security in “Internet of Things”

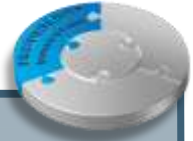

## NetBeans

- Day one support for new Java ME, SE and EE releases
- Support emerging technologies such as HTML 5
- Complete end-to-end development experience for web, desktop and embedded

# Java Scorecard 2012

## Technology - Results

### Java SE

- Added OS X and Linux ARM
- 7 update release and more than 300 enhancements

### JavaFX

- JavaFX 2.2 for Windows, OS X, and Linux
- JavaFX 1.0 SceneBuilder for Windows and OS X
- Open sourcing of JavaFX provides new opportunities for the community

### Java ME/ Embedded

- Introduced Java Embedded Suite – middleware stack for embedded
- Introduced Java ME Embedded for Java on microcontrollers
- Java ME/SE alignment planned for ME/SE 8 in CY2013
- Java ME 8 JSR submission being prepared in JCP

### Java EE

- 2 GlassFish releases
- Java EE 7 specification plan re-calibrated and due in CY2013
- Java EE 7 with HTML5 simplification

# Java Scorecard 2012

## Community - Results

### OpenJDK

- New projects: Penrose, OpenJFX, PowerPC/AIX ports, Sumatra GPU support
- Governance updates: Andrew Haley elected, and Doug Lea reelected
- 68 new OpenJDK contributors, including CBOE, SUSE, Taobao and numerous accomplished individuals

### JCP

- JCP.next: Greater transparency, Merge two ECs, Revised JSPA
- Adopt a JSR program initiated by London Java Community and SouJava
- 21 JSRs started since JavaOne 2011

### JUGs

- 25% increase in JUGs worldwide (from 157 to 197)
- 20+ new JUGs added this year, and growing
- 36% increase in JUG visits (from 50 to 68)

# Java Scorecard 2012

## Oracle Leadership - Results

### Ongoing Investment

- Continued growth of Oracle investment
- 4 regional JavaOne events with over 5,000 attendees

### Community Outreach

- Launched Java Magazine: 120K subscribers in first 12 months
- 17% increase in Java Developers Days (from 46 to 54)
- Evangelism outreach touched more than 500k developers WW

### Validation

- 17% increase in Java.net registered users (from 700K to 820K)
- 8% increase in active NetBeans users (1.1M to 1.22M)

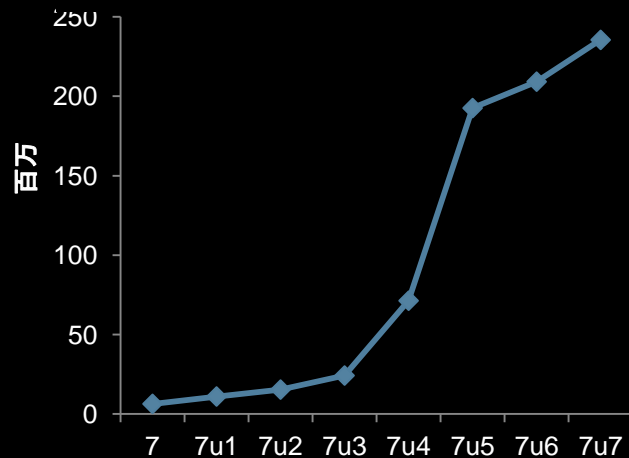

# The Java Platform

# JDK 8

## Innovation

- Lambda aka Closures
- Language Interop
- Nashorn
- JavaBean access

## Core Libraries

- Bulk Data operations for Core Collections APIs
- Improvements in functionality
- Improved type inference

## General Goodness

- JVM enhancements
- No PermGen limitations
- Performance Improvements

## Java for Everyone

- Profiles for constrained devices
- JSR 310 - Date & Time APIs
- Non-Gregorian calendars
- Unicode 6.1
- ResourceBundle.
- BCP47 locale matching
- Globalization & Accessibility

## Tools

- Compiler control & logging
- JSR 308 - Annotations on Java Type
- Native app bundling
- App Store Bundling tools

## Client

- Deployment enhancements
- JavaFX 8
- Public UI Control API
- Java SE Embedded support
- Enhanced HTML5 support
- 3D shapes and attributes
- Printing

## Security

- Profiles for constrained devices
- Limited doPrivilege
- NSA Suite B algorithm support
- SNI Server Side support
- DSA updated to FIPS186-3
- AEAD JSSE CipherSuites

# Roadmap

## Java SE

# Test Pilots Wanted

## Java SE and JavaFX

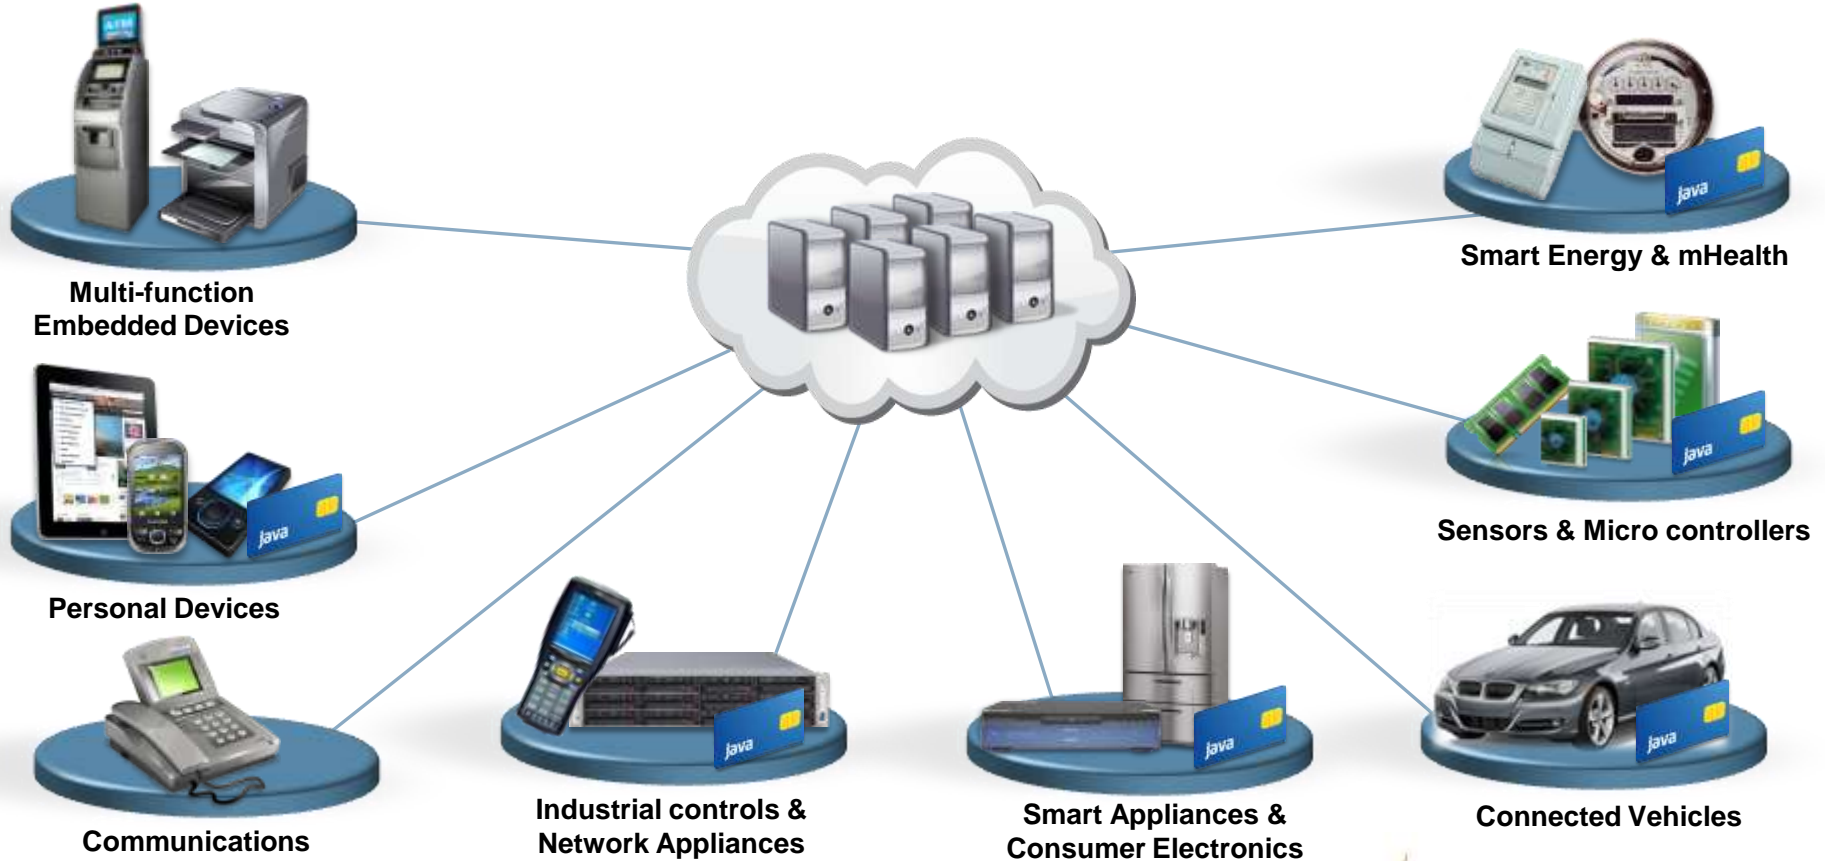

- Feature complete for JDK 8 in January of 2013, developer preview in February
  - Schedule on <http://openjdk.java.net/projects/jdk8>
- JDK 8 builds with many features already available
  - Try out Lambda and check out JavaFX 8
  - Early access on <http://jdk8.java.net/>
- Jigsaw builds also available from Java.net
- Join OpenJFX and put your print on new JavaFX API

# Java Embedded

# Java Embedded

# Oracle Java Embedded Offering Today

# New Embedded Releases

## Java ME Embedded 3.2

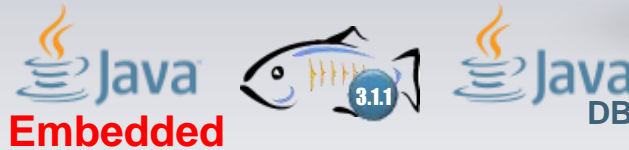

Runtime for small embedded devices: Microcontroller class platforms

**EDGE DEVICES**

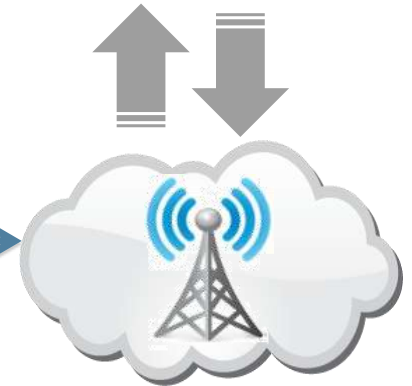

## Java Embedded Suite 7.0

Pre-integrated full featured Java Embedded Platform

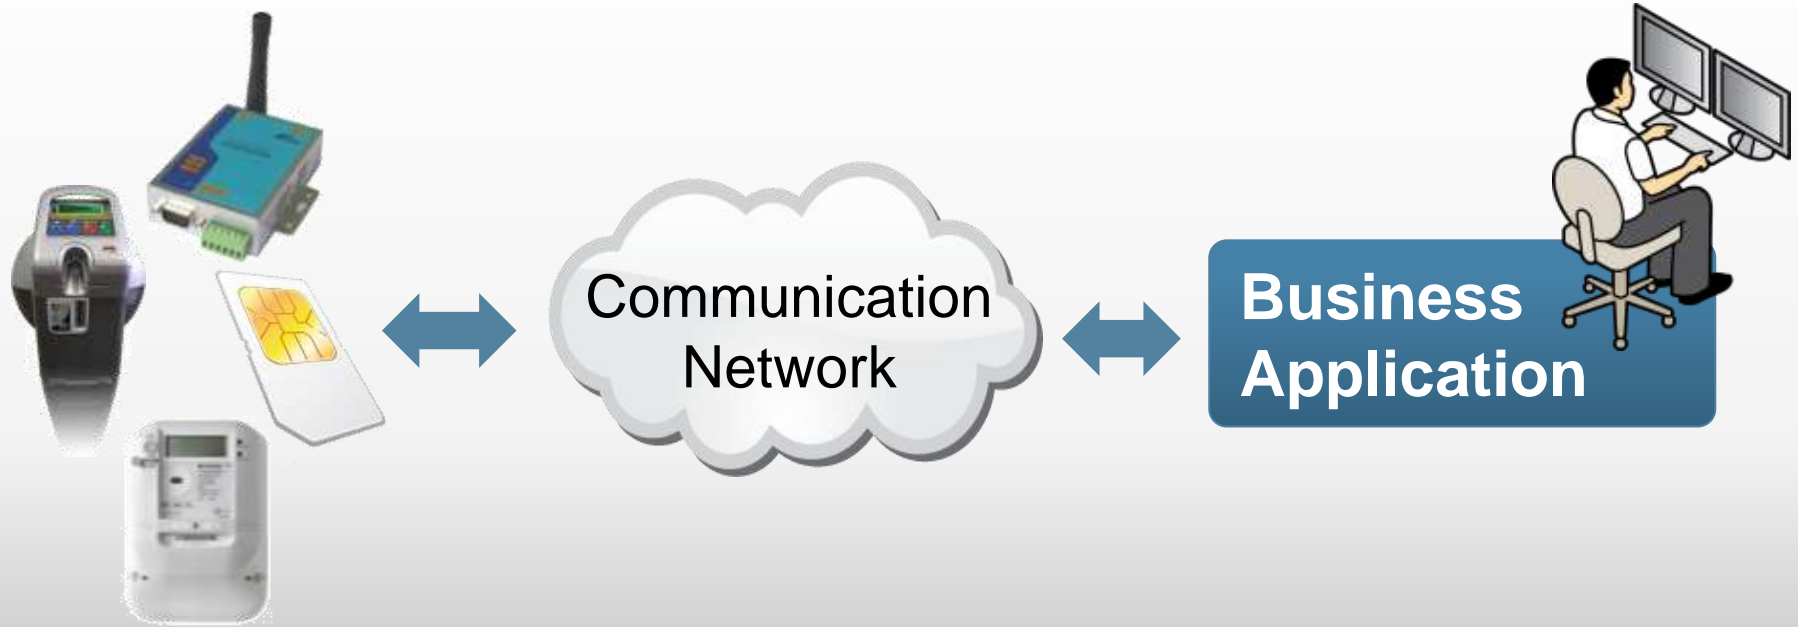

**GATEWAYS/CONCENTRATORS**

## Enterprise Data & Applications

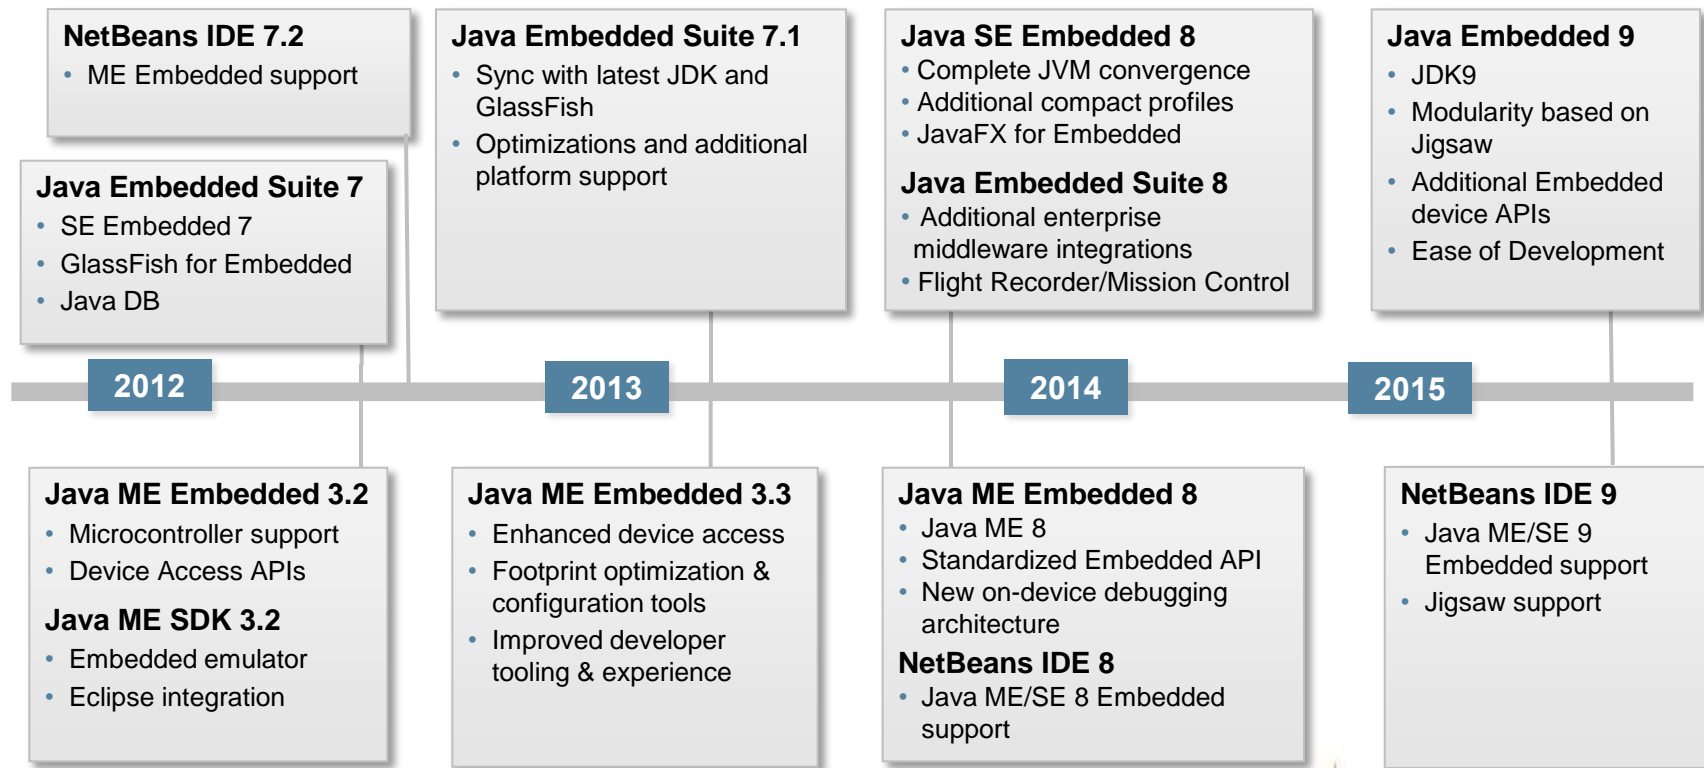

# Java Card

Building block for Embedded Security

# Roadmap

## Embedded Java

# Call to Action

Find out more about Embedded Java

- Download the latest releases and try Java Embedded
  - <http://www.oracle.com/technetwork/java/embedded/downloads>
- Join the Java Embedded community on Java.net

# Java EE

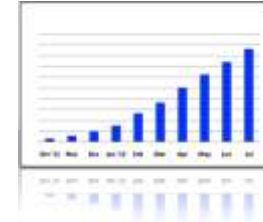

# Java EE Focus and Direction

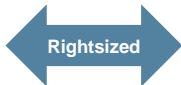

**Standard:** For Developing Enterprise Applications

**Productivity:** For Enterprise Java Developers

**Portability:** Across vendors, across clouds

**Extensibility:** Embracing innovation

**Rightsizing:** Supporting modular design

# Java EE Community

Java  
Community  
Process

Java EE 7

## 1 HUGE COMMUNITY

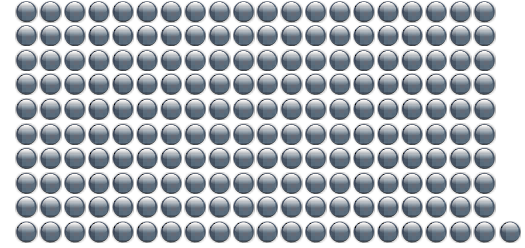

14 active  
JSRs

19 spec  
leads

32  
companies

201 experts

Java.net

Java EE 7

23 active projects, active  
and transparent mailing lists

GlassFish

2 Releases  
shipped

51 promoted builds

Java

ORACLE

# Java EE 6 Everywhere

# Java EE 7 for 2013

- **Scale to build dynamic HTML 5 Apps**

- WebSockets, Servlet 3.1 NIO, Server Sent Events, JSON, REST

## HTML

- **Continued Productivity Focus**

- More API pruning, built on Java SE 7, broader uptake of Dependency Injection
- And with Caching and Batch

```
@WebSocket(path="/echo")
public class EchoBean {
    @WebSocketMessage
    public String echo(String message) {
        return message + " (from your
server) ";}
}
```

# Feedback on Java EE 7

Java EE is **already 90% cloud ready** due to its focus on clear packaging, deployment and portability ...When it comes to the last 10% of unmet cloud needs, we are **clearly in a time of experimentation, not a time of standardization...** Vendors innovate, collectively we standardize. We are not done innovating in this space.

*David Blevins, Apache TomEE, Geronimo*

**Java EE 7 Cloud features likely to be delayed until 2015 – your view?**

Right call. Cloud standardization is a bad move with the market changing so much

...it is a **brave and honest decision** of the EG to realign Java EE 7 to the community needs and make a second try on Cloud and PaaS with the Java EE 8 Platform release scheduled for the spring of 2015...

*Markus Eisele, Java EE Consultant*  
<http://blog.eisele.net/>

Speaking as a Java EE implementer, we (Red Hat) are **very much in support of this**. We've long advocated that we, the Java EE community **are not ready to standardize cloud yet**, and feel this is proven by OpenShift, our Java EE cloud offering, which is working well with Java EE 6.

**redhat.** *Pete Muir, Redhat*

JavaOne

ORACLE

# Java EE Persistence for NoSQL

- No existing NoSQL standard yet
- EclipseLink NoSQL – JPA Style
  - MongoDB
  - Oracle NoSQL
  - Cassandra planned
  - And more coming
- Feedback wanted!

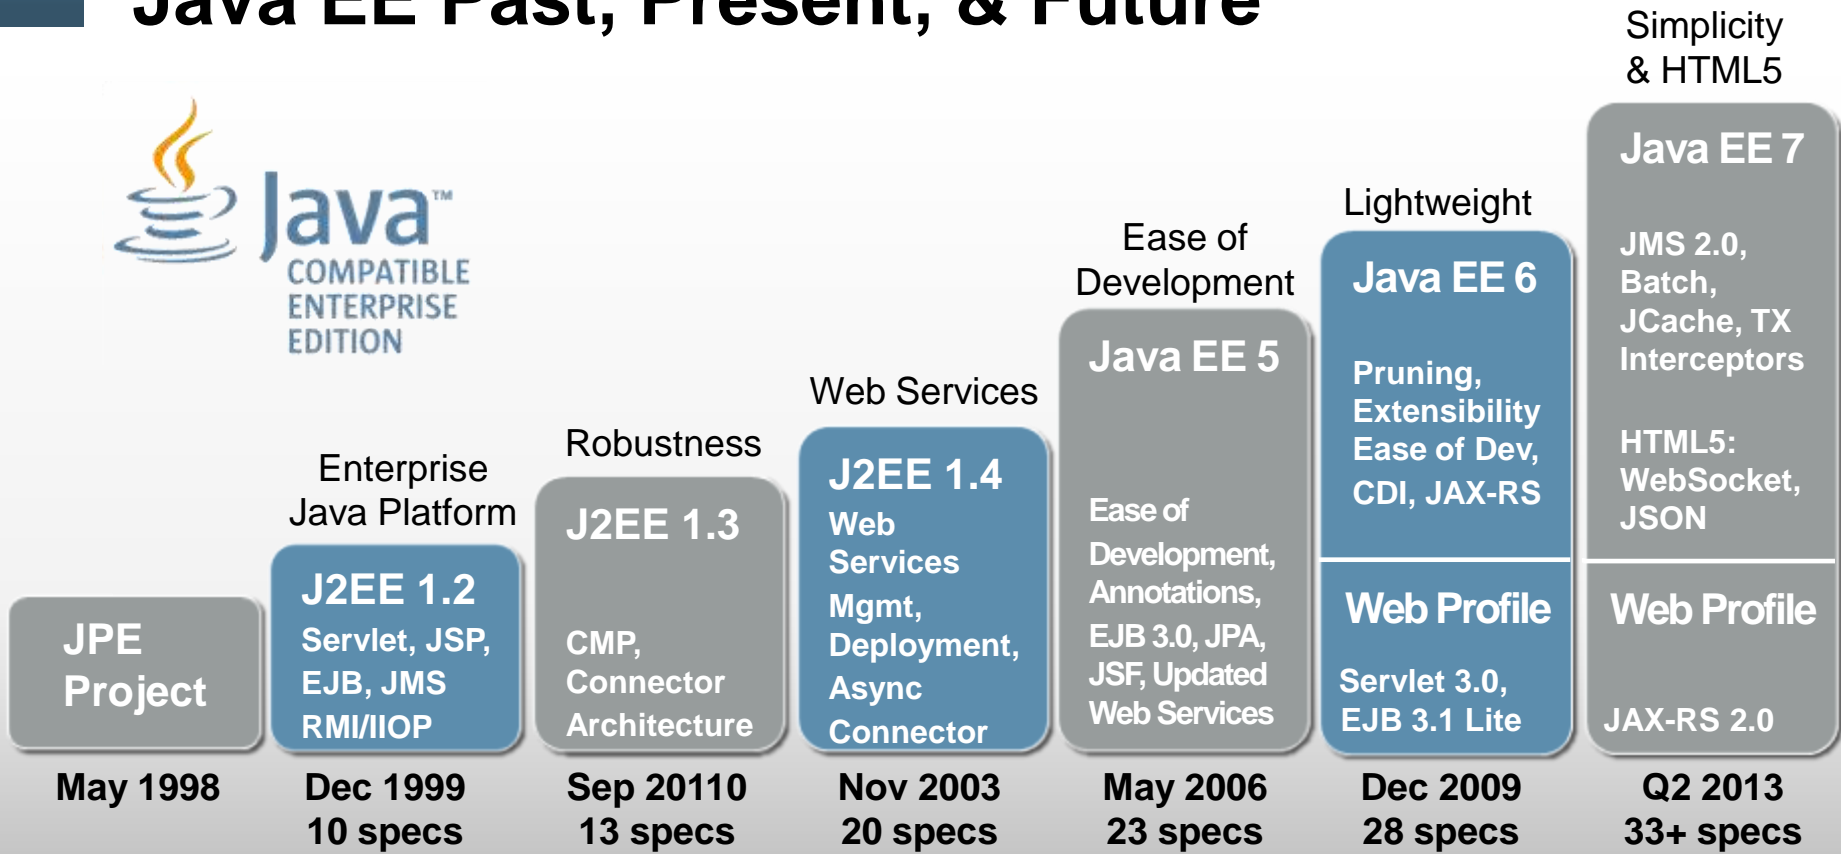

```
@Entity
@NoSql(dataFormat=MAPPED)
public class Order {

    @Id
    @Field(name="_id")
    private String id;
```

# Java EE Past, Present, & Future

# Java EE 8 and beyond

## Standards-based cloud programming model

- Deliver cloud architecture
- Multi tenancy for SaaS applications
- Incremental delivery of JSRs
- Modularity based on Jigsaw (EE 9)
